

EMPTY FRUIT BUNCH SHREDDER AND PRESS

SPECIALLY DESIGNED FOR BIOMASS BOILER AND OIL RECOVERY FROM EMPTY BUNCH

The system is designed to produce fibre suitable for biomass boiler, composting, etc., and to recover the oil from EFB. The EFB will be cut into smaller pieces before channelling to the pressing process. This arrangement will produce shorter and drier fibre and maximise the oil recovery.

Benefits:-

1. To recover oil from Empty Fruit Bunch
2. To produce EFB Fibre suitable for Boiler

THE EMPTY FRUIT BUNCH PROCESSING
